

PANMOL® ESSENTIAL FATTY ACIDS

www.PANMOL.com

...the Omega-Suppliers

ACTIVE INGREDIENTS:

- PLANT-BASED OMEGA 3 / 6 / 9 FATTY ACIDS
- PHOSPHOLIPIDS

PANMOL® ESSENTIAL FATTY ACIDS are a natural complex of valuable highly unsaturated fatty acids and phospholipids, which are obtained from high-quality oil seeds by pressing them at sparing temperatures and without the use of solvents. Omega 3 / 6 / 9 fatty acids and phospholipids are essential for human beings and their biological functions are not exchangeable. Even high-quality

vegetable oils usually contain unsaturated fatty acids only in an unbalanced composition. PANMOL® ESSENTIAL FATTY ACIDS, on the other hand, contain essential unsaturated fatty acids from all the valuable categories in a balanced composition. A special method makes PANMOL® ESSENTIAL FATTY ACIDS available not as an oil but in powder form.

TECHNICAL DATA:

- For capsules and oral powders
- Not soluble

POSSIBILITIES FOR YOUR INNOVATIVE NUTRIENT PRODUCT:

INDICATIONS:

- Stable nerve substance
- Elasticity of the skin
- Elasticity of the muscle system
- Better flowing properties of blood
- Normalisation of blood lipids
- Flexible immune system

TARGET GROUPS:

- Growing children and adolescents
- Children with learning and attention disorders
- Pregnant women and nursing mothers
- Persons with cardiovascular disorders
- Persons with dry skin
- Persons with a disposition for allergies
